Fact Sheet:

AFM Safecoat Paint and Finishes

August 23, 2007

AFM Safecoat manufactures paints, primers, clear coatings, stone and tile sealers, and stains so low in toxicity that they work for the chemically sensitive.

Many of today's building materials and coatings are loaded with toxic chemicals. They contribute to the problem of indoor air pollution through the process of evaporation called offgassing. AFM Safecoat paints, stains, and sealers are formulated to eliminate aromatic solvents, heavy metals and formaldehyde preservatives found in the typical paint or sealer. The result is a non-pollutant coating that also acts as a sealer to help reduce offgassing from the surface below.

****Available in Flat, Eggshell or Semi Gloss in several bases to achieve 940 colors;
All prices listed below include the following tinting charges: \$1/quart; \$3/gallon; \$20/5 gallon**

PRODUCT	1 Quart	1 Gallon	5 Gallons
