## Fact Sheet:

# TREX<sup>®</sup> EASY CARE DECKING

January 13, 2007

Trex<sup>®</sup> decking is a wood and plastic composite made primarily from equal parts reclaimed hardwood sawdust and recycled polyethylene plastic such as grocery sacks. The combination of wood and plastic in Trex<sup>®</sup> products offers the best of both materials. The plastic shields the wood from moisture and insect damage; the wood protects the plastic from UV damage and provides additional stability and traction.

### Warranty

Trex<sup>®</sup> offers a one-time transferable 25-year warranty against splintering, splitting, checking, rot, decay and termite damage.

### Advantages

- Requires no stains or sealants for protection and will not rot or deteriorate due to harsh weather conditions
- Splinter-free and contains no toxic chemicals or preservatives
- Can be cut, drilled, routed and nailed using standard tools. Carbide blades are recommended for best performance
- Provides the design freedom to give you the deck of your dreams

**Colors:** Winchester Gray, Saddle, Madeira, Woodland Brown

ITEM	Colors	Lengths	Cost/Linear Ft.	Cost Per Piece/12',16',20'
