**MILLION
GALLON
CHALLENGE**

Help Eco-Products save the energy equivalent of
1,000,000 gallons of gasoline by choosing foodservice
products made from plants.

**MILLION
GALLON
CHALLENGE**

How do I get involved?

It's easy. Talk to your distributor, broker, or Eco-Products sales representative about getting your own customized Certificate of Resources Saved. We'll take your annual usage and calculate the gallons of gasoline you are saving by choosing Eco-Products foodservice disposables. Stop by our booth to see what your certificate might look like!

What is the Million Gallon Challenge?

The Million Gallon Challenge is a campaign designed to help our customers understand why Eco-Products offers a more responsible and sustainable choice when it comes to single use foodservice containers.

What do gallons of gasoline have to do with foodservice disposables?

Our products take less energy to make. We calculate the energy savings associated with using our products and convert that into gallons of gasoline, similar to conversions used in many EPA communications.

How much gasoline can I save by choosing Eco-Products?

120 cases of
16oz GreenStripe™
cold cups saves:
491 gallons

120 cases of
16oz World Art
